# BEFORE YOU BUY

## UNDERSTANDING HOW LIGHTING AFFECTS THE LOOK OF YOUR FLOORS

Lighting plays a crucial role in showcasing the beauty and character of your flooring. The intensity, direction, and colour temperature of light sources can dramatically alter the appearance of your floors throughout the day.

Natural sunlight can bring out the warmth of wooden textures or the depth of natural stone, while artificial lighting can influence how colours are perceived.

Understanding the interplay between lighting and flooring helps in selecting materials that complement your desired ambiance and maintain their visual appeal under different lighting conditions. Taking all this into consideration, the colour of the images photographed on this brochure may vary to the actual product. For the best representation, we recommend visiting one of our retailers or ordering a free sample from the Heartridge website.
